Skills

Languages Java, SQL, HTML, CSS, Javascript, Typescript

Tools Windows, Eclipse, VS Code, Docker, Git, Database

Technologies React, Angular, NodeJS, Sass, Bootstrap

Experience

Fidelity Investments

June . 2022 – January . 2023

Full Stack Developer

NYC, NY

- > Contributed to a high-performing development team, working in a fast-paced Agile environment and participating in daily SCRUM stand ups. This experience honed my ability to work effectively in a team setting and communicate with both technical and non-technical stakeholders.
- > Developed a real estate API capstone project, utilizing my skills in web development to create a user-friendly application that retrieves real-time housing information, such as prices and photos. This project demonstrated my ability to integrate APIs into web applications, making me a strong candidate for full stack development roles that require experience in web development.
- > Language/Tech stack utilized: Java, SQL, HTML, CSS, JS, TS, Angular

Amazon

October . 2021 – May . 2022

Area Manager

Cranbury, NJ

- > Managing and leading a team of Process Assistants, coaching and mentoring the team to ensure performance objectives are met
- > Worked closely with support staff (HR Manager, Financial Manager, Facilities Manager, IT Manager) to build support and resources for projects.

Pfizer

Jan . 2020 – Sept . 2021

Associate Researcher

Pearl River, NY

- > Maintain work stations, utilize proper pipetting to test samples, and keep track of specimens.
- > Train new associates/interns and manage databases

Education

New Jersey Institute of Technology

2014 – 2018

Bachelors in Bioinformatics

Newark, NJ

Projects

Arknights Wiki - HTML, CSS, TypeScript, Angular

- > Utilized Rhodes API to create a user-friendly platform for searching different characters in the popular mobile game, Arknights.
- > Implemented HTTP requests/fetch and asynchronous programming to provide real-time updates and information about each character, including images and background details.
- > Developed a single-page website with a responsive design, utilizing flexbox layout to ensure optimal viewing on multiple devices. This project highlights my proficiency in HTML, CSS, TypeScript, and Angular, and my ability to create dynamic, interactive web experiences.

Arknights character directory - Java, SQL

- > A program that allows users to add, remove, update, and view different character information in a database
- > Implemented a JDBC interface to make connection with a SQL database and CRUD operation in order to interact with information stored in the database
- > Utilized all 4 types of OOP in order to structure the project better
